**Type** Shapefile

**Tags** forest fires, wildland fires, wildfires, fire location, fire point data, fire history, natural disturbance, Canada

### Summary

The Canadian National Fire Database (CNFDB) Fire Point and Polygon Data is a collection of forest fire locations and fire perimeters as provided by Canadian fire management agencies including provinces, territories, and Parks Canada. The forest fire data contained in the CNFDB have a wide range of uses including national scale mapping, statistical and spatial analysis and research involving natural disturbance.

Note that the "large fire" version of the database includes only large fires greater than 200 hectares (as reported by agency) — these represent a small percentage of all fires but account for most of the area burned (usually more than 97%).

### Description

The Canadian National Fire Database (CNFDB) Fire Point and Polygon Data is a collection of forest fire locations and fire perimeters as provided by Canadian fire management agencies including provinces, territories, and Parks Canada.

To create the Canada-wide product, the data collected from each agency are projected into a common format and combined with data from other agencies; attribute fields are standardized; agency specific attribute fields are removed; and polygon areas are calculated using GIS.

Note that the data contained in the CNFDB are not complete nor are they without error. Locations are approximate. Not all fires have been mapped, and data accuracy varies due to different mapping techniques. This collection includes only data that has been contributed by the agencies. Data completeness and quality vary among agencies and between years.

For analyses for a single province or territory or for Parks Canada, we suggest you contact the appropriate agency. Links to the agency web sites can be found at <https://cwffis.cfs.nrcan.gc.ca/or> can be found through the Canadian Interagency Forest Fire Centre (CIFFC) website at <http://www.cifffc.ca>

The database is a large collaborative effort by all Canadian fire agencies. We thank the many individuals who contributed to this effort, including fire crews, field personnel, photo interpreters, pilots, digitizers, and analysts. Compilation of the Canada-wide database was partially supported by the Canadian government programs of ENFOR (ENergy from the FORest), the Program on Energy Research and Development, the Climate Change Action Fund, and Action Plan 2000.

Note that the "large fire" version of the database includes only large fires greater than 200 hectares (as reported by agency) — these represent a small percentage of all fires but account for most of the area burned (usually more than 97%).

=====

Les données ponctuelles et polygonales de la BNDFFC sont recueillies auprès des agences de gestion des feux de forêt, y compris celles des provinces et territoires et Parcs Canada. Pour obtenir un produit pancanadien, les données recueillies auprès de chaque agence sont projetées dans un format commun et combinées aux données d'autres agences, les champs d'attributs sont normalisés, les champs d'attributs propres à une agence sont supprimés, et la superficie des polygones est calculée à l'aide d'un SIG.

Il est à noter que les données contenues dans la BNDFFC ne sont ni exhaustives ni sans erreur. Tous les feux n'ont pas été cartographiés, et l'exactitude des données varie selon les différentes techniques de cartographie. Cette base de données ne contient que les données fournies par les agences. L'exhaustivité et la qualité des données peuvent varier d'une agence et d'une année à l'autre.

Pour obtenir des analyses à l'égard d'une province ou d'un territoire unique ou de Parcs Canada, communiquez avec l'agence responsable appropriée. Les liens aux sites Web des agences sont disponibles via le [Centre interservices des feux de forêt du Canada \(CIFFC\)](#).

Cette base de données est le fruit d'un travail de collaboration entre tous les organismes de lutte contre les incendies du Canada. Nous remercions tous ceux qui ont contribué au projet, notamment les équipes de pompiers, le personnel de terrain, le personnel de photo-interprétation, les pilotes, les responsables de la numérisation et les analystes. Le travail de compilation de cette base de données à l'échelle canadienne est appuyé par les programmes canadiens ENFOR (Programme de l'énergie forestière) et PERD (Programme de recherche et développement énergétique) et par le Fonds d'action sur le changement climatique et le Plan d'action 2000.

Supplemental information  
Collection status and version notes regarding data updates and sources:

BC:  
- BC fire data updates downloaded from DataBC website <https://catalogue.data.gov.bc.ca/>;  
- This version includes BC points for 1950-2025;  
- Fire point data for 2025 have been updated in this version using source data;  
- Only records included where FIRE\_TYPE = "fire" in source data;  
- The BC fire data is published by the BC Ministry of Forests, Lands and Natural Resource Operations - BC Wildfire Service  
Licensed under Open Government License - British Columbia -- <https://catalogue.data.gov.bc.ca/>

AB:

- AB fire data updates obtained from <https://www.alberta.ca/wildfire-maps-and-data>
- This version includes AB points for 1959-2025;
- Fire point data for 2025 have been updated in this version using source data;

#### SK:

- SK fire data updates provided by agency;
- This version of NFDB points includes SK points for 1959-2025;
- Fire point data for 2025 have been updated in this version using source data;
- Note that years 1959-1980 are incomplete as these years include only large fires > 200ha;

#### MB:

- MB fire data updates obtained from Manitoba Conservation Fire Program;
- This version includes MB fire point data for years 1959-2025;
- Fire point data for 2025 have been updated in this version using source data;
- Note that years 1959-1967 are incomplete as these years include only large fires > 200ha;
- Also note that fire point data for 2000-2004 is not available from source agency, therefore point data (for 2000-2004) has been derived using fire polygon centroids;

#### ON:

- ON fire data updates downloaded from Ontario LIO website <https://geohub.lio.gov.on.ca/>;
- This version includes ON fire point data for years 1959-2025;
- Fire point data for 2025 have been updated in this version using source data;
- Note that years 1959-1975 are incomplete as these years include only large fires > 200 ha;
- Note that the Ontario fire data has been produced by Natural Resources Canada under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2024;

#### QC:

- QC fire data updates downloaded from <https://www.donneesquebec.ca/>
- This version includes QC fire point data for years 1959-2025;
- 2025 QC fire point data updates were added to this version;
- Note that years 1959-1971 include only data for large fires > 200 ha;
- The Quebec open data license agreement is available here <https://www.donneesquebec.ca/fr/licence/#cc-by>

#### NS:

- NS fire data updates provided by agency;
- 2025 NS fire point data updates were added to this version;
- This version includes NS fire point data for years 1960, 1961, 1963, 1980, 1987-2025;
- Years 1960-1984 are incomplete as these years include only large fires > 200 ha;

#### NB:

- NB fire data updates provided by agency;
- 2025 NB fire point data updates were added to this version;
- This version includes NB fire point data for years 1980, 1982, 1983, 1985-2025;
- Note that years < 1989 are incomplete as these years include only a small number of large fires;

#### NL:

- NL fire data provided by agency;
- 2025 NL fire point data updates were added to this version;
- 2022-23 NL fire point data updates were added to this version;
- This version includes NL fire point data for years 1955-2025;
- Note that years < 1985 are incomplete as these years include only a small number of large fires > 200 ha;

#### PEI:

- This version includes PEI fire point data for years 2018-2025;
- 2020-2025 PEI fire point data updates were added to this version;

#### YT:

- YT fire data updates downloaded from <https://mapservices.gov.yk.ca/>;
- This version includes YT fire point data for years 1946-2025;
